DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greenberg et al. (US 6,314,580) in view of Macinai et al. (US 5,725,039).

Greenberg et al. (hereinafter Greenberg) discloses pockets forming article containing space with each defining a piece of seal cloth (24, 26, 28, 30) being sewn onto front and rear sides on an interior surface of a garment, respectively, with an upper edge of each of the pocket being open, col. 5, lines 14-18 and as shown in figure 1-A. Further, each of the pockets includes a fastening means (52, 56, 58, 62) being detachably fastened by hook and loop material, col. 6, lines 4-9. Greenberg discloses the invention as set forth above except for showing a dimensioned bag-like catch extension formed in the vicinity of the seal cloth and a fastening means including a magnet.

Macinai et al. (hereinafter Macinai) discloses a pocket (10) having a flap (22) with a thin piece (46) formed conventionally of metal that is attached to magnets (48,50) lined within a body of the pocket, col. 3, lines 44-53.

It would have been obvious to one skilled in the art that the pocket of Greenberg when viewed with Macinai can include the seal cloth to define a dimensioned contiguous catch extension as a matter of design choice or depending on the end use thereof.

Further, it would have been obvious to one skilled in the art that the pocket of Greenberg when viewed with Macinai having a thin metal piece within the seal cloth can provide structural reinforcement thereto when fastened in a closed position. Also, it would have been obvious to one skilled in the art at the time the invention was made to provide the small cloth and fastening means of Greenberg with magnets and a metal bar as taught by Macinai, respectively as an alternative but equivalent means of fastening the pocket as known in the art, so that desired items are retained within the pocket. Further, it is obvious that any conventional type of complementary flexible/rigid magnets being a sheet, disc, etc can be use as required for a particular application thereof.

With regard to claim 3, it would have been obvious that the seal cloth of Greenberg when viewed with Macinai can be made of a different material than the garment, depending on the materials that were available at the time the invention was made.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
